WORK EXPERIENCE

RankFantasySports
Web Application Developer

(August 2017 - March 2021)

RankFantasySports is a provider of professional sports player data analysis & automated daily fantasy sports contest lineup creation

- Designed, developed & maintained a progressive web app capturing over 2,000 subscriptions as one of the only mobile-first apps on the market
- Deployed web app on a global CDN using Serverless Functions and dynamic hosting minimizing expenses & improving app performance by reducing calls to the back-end
- Integrated real-time, cross-device predictive analytics improving User Experience improving subscription rates by 17% and reducing churn by 50%

Reagor Dykes Innovations
Web Application Developer

(February 2017 - August 2017)

Reagor Dykes Innovations developed applications & managed web technology for Reagor Dykes Auto Group, a 21 store auto group grossing $800M annually

- Developed & maintained a cross-platform VR and '360 spin' inventory image management web app resulting in deeper user engagement driving a 27% increase in lead conversions
- Developed a web app utilizing CRM sales data, call-tracking, and several APIs to attribute vehicles sold, lead conversion events and the corresponding cross-platform customer's journey on inventory websites which enabled the previously unattainable precise calculation of interdepartmental costs/commissions

Signature Color Film
Web Application Developer

(April 2014 - Present)

Signature Color Film provides photography film processing services

- Design, develop & maintain a progressive web app leading to the capture of over 500 rolls of film
